1. Introduction

Purpose of the Report

The Standard Tables Report is the first 2001 Census Report to present cross-tabulated information. This enables more aspects of each topic to be included, providing for an in-depth analysis of the characteristics of the population.

The Report provides a selection from the very large number of Standard Tables available. They are selected on the basis of experience of key topics of greatest interest. The data provided is summarised and, as far as possible, simplified from the complex set of tables released by the Office for National Statistics (ONS).

The Report is intended to provide Councillors, Council staff, the public, partner agencies, businesses and other users with a more detailed profile of Calderdale to complement the Key Statistics Report and Ward Profiles.

Standard Tables are also available for the Ward boundaries in force at the time of the 2001 Census. However, these are currently only available in their original form, and are substantially larger and more complex than those provided in this Report.

Any enquiries about other topics for the District, or about Ward-level Standard Tables, should be made to the Chief Executive's Office – contact details below.

Structure of the Report

The topics covered in this report are broadly similar to those in the Key Statistics and Ward Profiles Report and include: Economic Activity, Health, Family Composition, Ethnicity and Household Amenities.

The tables presented in the report are in the same basic format as is used in the Key Statistics Report, though in this case the information is solely for Calderdale.

Table Format

The format of the tables has been standardised for each topic where possible.

Each topic has two tables; the initial table presents the number of people in each category whilst the second shows the same information in a percentage format. Some topics, namely Ethnicity and Family Composition, have additional tables to enable more detailed statistics to be included.

Where appropriate, the initial column of data provides the overall population, number of families or number of households. This is followed by the total numbers for the group of people, families or households and subsequently the smaller groups that make up the total.

Help Desk

Further assistance and explanation, as well as help in accessing more detailed Census information, can be obtained from the Chief Executive's Office – contact Jenny Eaglestone (01422 393129) or Yvette Fisher (01422 393154), or e-mail researchandinfo@calderdale.gov.uk

For more information or assistance about Census publications generally visit the websites: www.statistics.gov.uk/census or www.neighbourhood.statistics.gov.uk

Standard Tables - Definitions and Explanation

A. General Points

In this set of tables, figures are presented on a topic, first in actual numbers and then in percentages. Columns shaded and in bold show totals or sub-totals. Heavy lines distinguish different sections, or different ways of analysing the data.

The percentages shown are *usually* presented so as to total 100 either across the row or down the column; sometimes, they refer only to the percentage of overall total (of population, households etc). A brief description is provided above each table which explains this.

B. Definitions and Explanation

Table 1: "*Married*" includes re-married

Table 2: A "*family*" is a group of people consisting of a married or cohabiting couple (with or without children) or a lone parent with child(ren). It can include same-sex couples.

(Note: A "*household*" comprises one or more families **and/or** one or more individuals. Households with only one person, or where the occupants are not related in the ways defined above, do not contain any families. Consequently, the number of families is different to the number of households.)

A "*dependent child*" is a person in a household aged 0 to 15 (whether or not in a family) or a person aged 16 to 18 who is a full time student in a family with parent(s). An adult in a household is defined as a person who is not a dependent child.

"*Lone parents*" are classified as married if they denote their marital status as married but have no spouse or partner identified in the relationship matrix. The "*Family Reference Person*" (*FRP*) is a description allocated by the Census Office. In a lone parent family, it is the lone parent. In a couple family, it is the person with the "highest level" of economic activity, so that if one parent worked full-time and one worked part-time, the full-time worker would be defined as the Family Reference Person. If both have the same "level" of economic activity, the older is the Family Reference Person. If both also are the same age, the Family Reference Person is the first named on the returned Census Form.

Table 3: This table only includes "*household residents*"; therefore the population figures are lower due to the exclusion of residents in communal establishments (such as residential homes, hospitals)

"*Limiting Long-term Illness*" is defined on the Census Form as "any long-term illness, health problem or disability which limits your daily activities or the work you can do".

Table 4: "*Part-time*" is defined as working 30 hours per week or less.

"*Students*" are categorised in the 2001 Census as economically active or inactive, and the economically active can be broken down into those in paid employment and those actively seeking, and available for, paid employment.

Table 5: The Census Form asked people to write in the title and description of their main job (and that of others in the household). These were then coded in line with the Standard Occupation Classification 2000 to produce the categories shown.

Tables 6 & 7: The Census Form asked people to describe the business of their employer at the place they worked. This was then coded in line with the Standard Industrial Classification 1992 to produce the categories shown. “*Other*” includes other, social and personal services, private households with employed persons and extra-territorial organisations and bodies

Tables 8 & 9: “*Shared Ownership*” means paying part rent, part mortgage. “*Social Housing*” includes rented from the Council, or rented from a Registered Social Landlord or Housing Association. “*Privately Rented*” includes renting from a private landlord or letting agency, from an employer of someone in the household, or from a friend or relative.

Table 10: “*Without a car or van*”. The Census definition of having a car or van includes have a company vehicle available for private use. “*Households with Dependent Children Household, Other*” includes two adults (not a couple) with dependent children, or 3+ adults with dependent children. “*Other Households, Other*” includes all households with 2 or more adults (at least one of whom is a non-pensioner) with no dependent children; and lone parents with only non-dependent children.

Table 11: See notes for Tables 8 & 9 and Table 10

Table 12: “*White, Other*” includes “White, Irish” and “White, Any Other”. “*Mixed, Black*” includes “Mixed, White and Black Caribbean” and “Mixed, White and Black African”.

Standard Tables – Guidance Notes and Definitions

A. General Points

In this set of tables, figures are presented on a topic, first in actual numbers and then in percentages. Columns shaded and in bold show totals or sub-totals. Heavy lines distinguish different sections, or different ways of analysing the data.

The percentages shown are *usually* presented so as to total 100 either across the row or down the column; sometimes, they refer only to the percentage of overall total (of population, households etc). A brief description is provided above each table, which explains this.

B. Definitions and Explanation

Table 1:

- "*Married*" includes re-married

Table 2:

- A "*family*" is a group of people consisting of a married or cohabiting couple (with or without children) or a lone parent with child(ren). It can include same-sex couples.
- A "*household*" comprises one or more families **and/or** one or more individuals. Households with only one person, or where the occupants are not related in the ways defined above, do not contain any families. Consequently, the number of families is different to the number of households.
- A "*dependent child*" is a person in a household aged 0 to 15 (whether or not in a family) or a person aged 16 to 18 who is a full time student in a family with parent(s). An adult in a household is defined as a person who is not a dependent child.
- "*Lone parents*" are classified as married if they denote their marital status as married but have no spouse or partner identified in the relationship matrix.
- The "*Family Reference Person*" (*FRP*) is a description allocated by the Census Office.
 - ◆ In a lone parent family, it is the lone parent.
 - ◆ In couple families, it is the person with the "highest level" of economic activity, so that if one parent worked full-time and one worked part-time, the full-time worker would be defined as the Family Reference Person. If both have the same "level" of economic activity, the older is the Family Reference Person. If both also are the same age, the Family Reference Person is the first named on the returned Census Form.

Table 3:

- "*White, Other*" includes "White, Irish" and "White, Any Other".
- "*Mixed, Black*" includes "Mixed, White and Black Caribbean" and "Mixed, White and Black African".

Table 4:

- This table only includes "*household residents*"; therefore the population figures are lower due to the exclusion of residents in communal establishments (such as residential homes, hospitals).
- "*Limiting Long-term Illness*" is defined on the Census Form as "any long-term illness, health problem or disability, which limits your daily activities or the work you can do".

Table 5:

- "*Part-time*" is defined as working 30 hours per week or less.
- "*Students*" are categorised in the 2001 Census as economically active or inactive, and the economically active can be broken down into those in paid employment and those actively seeking, and available for, paid employment.

Table 6:

- The Census Form asked people to write in the title and description of their main job (and that of others in the household). These were then coded in line with the Standard Occupation Classification 2000 to produce the categories shown.
- Percentages for All, Males and Females totals relate to the population aged 16-74 years. Unemployment rates therefore cannot be compared with the usual definition which measures unemployment as a proportion of the economically active population aged up to pensionable age.

Tables 7 & 8:

- The Census Form asked people to describe the business of their employer at the place they worked. This was then coded in line with the Standard Industrial Classification 1992 to produce the categories shown.
- "*Other*" includes other, social and personal services, private households with employed persons and extra-territorial organisations and bodies

Tables 9 & 10:

- "*Shared Ownership*" means paying part rent, part mortgage.
- "*Social Housing*" includes rented from the Council, or rented from a Registered Social Landlord or Housing Association.
- "*Privately Rented*" includes renting from a private landlord or letting agency, from an employer of someone in the household, or from a friend or relative.

Table 11:

- "*Without a car or van*". The Census definition of having a car or van includes having a company vehicle available for private use.
- "*Households with Dependent Children Household, Other*" includes two adults (not a couple) with dependent children, or 3+ adults with dependent children.
- "*Other Households, Other*" includes all households with 2 or more adults (at least one of whom is a non-pensioner) with no dependent children; and lone parents with only non-dependent children.
