Community Energy Local Opportunity

An introduction to how you and your community can benefit from generating renewable energy.

A one hour session providing an overview of the opportunities of investing in local renewable energy and the practicalities of how to do it.

The session will cover:

- Overview of renewable energy capacity in Calderdale
- Different micro generation options
- Finances
- Legal structures
- Next steps

Solar

Wind

Biomass

Hydro

Calderdale Council and Alternative Technology Centre can come to you to deliver this session and answer all your questions on renewable energy generation.

The event will include lively discussion and information on further support from Calderdale Council and other organisations.

The session is free and we will even bring refreshments. If you are interested in hosting a session or would like to find out where other sessions are being held please contact:
