

Cabinet Meeting: Monday, 04 November 2024

Question from: David Pugh

Question to: Cllr Durrans

On the council website it says, CVSH have now provided us with enough information for a decision to be made.

Given that CVSH have not supplied the manufacturers technical documentation for the Incinerator. Is the council confident that the Incinerator can safely burn up to 2 tons per hour of skip waste?

Response

Satisfactory information to allow a burn rate of up to 2 tonnes per hours has not been supplied therefore this rate will not be considered.
