

Cabinet Meeting: Monday, 10 February 2025

Question from: Jill Wilkinson

Question to: Councillor Durrans

Why did the CMBC officers find so many errors and inaccuracies to be acceptable in the CVSH EP Application (e.g. burn rate, date of machine manufacture, sensitive human receptors map etc.) when the objectors' detailed and technical objections addressing the relevant regulations were dismissed as being merely 'dissatisfaction with the thought of the operation of an incinerator'? As an example please see comments from Rick Davis in his submission (and there are many more with this level of detail)

Response

Calderdale Council officers worked through the application and technical detail supplied. Any inaccuracies were investigated, and it was deemed that sufficient information had been provided and obtained to be able to sufficiently demonstrate that compliance with the relevant legislation could be achieved.
